

The art of walls

by WILD STONE^{UK}

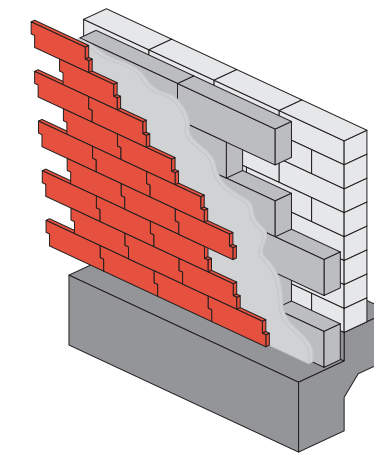

Crafted by industry specialists with a passion for providing high quality, cost effective & innovative products — Wild Stone is unique in both system and appearance

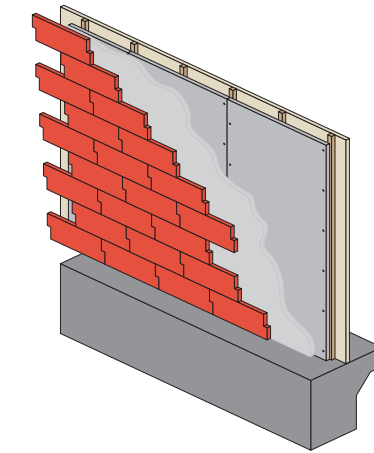

METHODS OF CONSTRUCTION

All of our Wild Stone products are versatile in their application and suited to many different methods of construction whether your project is timber frame, steel structure or traditional block work.

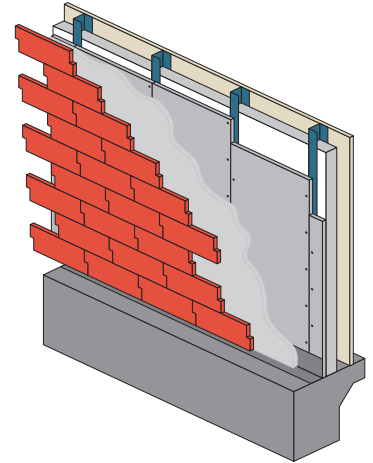

Our specially formulated masonry adhesive has been tested against concrete, concrete block, brick, and cement based building board ensuring that your choice isn't limited regardless of your substrate.

Traditional Method

Timber Frame Method

Steel Frame Method

WILDSTONE ENGINEERED

Engineered stone & brick systems

The Wild Stone Engineered Range has been Crafted by industry specialists with a passion for providing high quality, cost effective alternatives to real stone, unique in both system and appearance and offer a finish equal to any traditional application.

With all the natural aesthetics and visual appeal of traditional quarried stone our engineered range has all the appeal of granite, limestone, sandstone and slate but offers superior strength with reduced structural loadings. Less than 50Kg per m² make it suitable for a variety of applications and also easier to handle.

Wild Stone Engineered Range is quick and easy to install, no specialist tools or skills are required. With L-shaped corner quoins on all ranges and jointed and unjointed options, suitable for Trade, Self-Build or DIY.

Available in a variety of textures and colours that replicate any traditional applications.

HOLLAND BRICK — Lazio

WILDSTONE NATURAL

Real stone simplified

Our Natural range has been designed to simplify the use of natural stone for both internal and external applications. The Z-shaped panels made from slips of real stone, fit seamlessly together, making them both fast and easy to install, so you can achieve a real stone finish at a fraction of the price.

Our panelling system also includes L-shaped corner quoins for speedy installation and eliminates the need for specialist labour with virtually no waste (average less than 10%). Panels are quicker and easier to install, and don't require you to plan the layout of individual slips ahead of time.
